Areas of Non-Compliance

- Customer must identify all dogs to a record. Breeder must construct individual dog records.
- Customer must construct litter record Customer must meet AKC dog care/conditions standard

On Wednesday, June 21, 2006 I inspected Donald Pullen. The inspection took place at his kennel. My data base showed there to be 40 adult dogs registered to this person. I found there to be 85 adult dogs on this property. Of those 85 adult dogs 60 number were AKC registered. The remaining 25 dogs are registered with ACA registry. My data base showed there to be 20 litters this period for this location. There were 74 litters total in my database. There were 22 puppies on the property at the time of this inspection. Of those 22 puppies 7 are AKC eligible for registration. The primary kennel facility for this location are covered runs with plastic dog houses. The whelping house is in/out on elevated wire. The Litter Records and Ownership/Breeding records were found to be in good order. The facility meets the AKC requirements for care and conditions.
